

GOOD HEALTH WINS

ETA PHI BETA SORORITY, INCORPORATED

Dr. Jackie with the facts.

LIE 1:

The COVID-19 vaccine causes infertility.

We have done the research and it concludes that the COVID-19 vaccine **DOES NOT** impact our reproductive health. Unvaccinated pregnant women can actually get sicker if they contract the virus.

LIE 2:

The COVID-19 vaccine can alter your DNA.

The vaccine **DOES NOT** alter your DNA. In fact, we have new vaccine technology that uses mRNA (A SPECIAL PROTEIN) instead of deactivated virus material. When this special protein is injected into your body, it teaches your body to boost its immune response towards COVID-19.
