"Eta Phi Beta Sorority, Incorporated: Continuing a Legacy of Education, Community Service and Sisterhood"

Scholarships are important because -

- Scholarships provide an opportunity for students to earn an education. Without assistance from an outside source, students may have trouble paying for the degree.
- Scholarships help students have more time to focus on their studies. Research shows that work can take up more than 15 hours per week and becomes an obstacle to academic success. For many students, the stresses of working make it difficult for them to graduate on time, or graduate with the high grades they have the potential to achieve. For other students, the work/study life is unsustainable, and they discontinue their studies altogether.
- Scholarships can fill the gap. Scholarship assistance can support students who fall in the gap between high and low-income levels – students who may not qualify for a need-based scholarship and who do not meet the criteria for a merit-based scholarship. Scholarships also decrease the number and amount of loans students need to take to complete college.
