

BRADFIELD BRIEF

OCTOBER 2023

Fall brings sweater weather, spectacular displays of foliage, and harvest celebrations. For many, the equinox marks the start of a glorious season, filled with apple picking and pumpkin carving. For others, though, autumn is a melancholy reminder of summer's end—less cookouts and beach reading.

October is Breast Cancer Awareness Month and Domestic Violence Awareness Month, yet these two issues are more interconnected than we realize. It is not enough to wear a pink or purple t-shirt. We must advocate for research, education, and policies that remove barriers to women's health and wellbeing.

GHWINS
Good Health Women's Immunization Networks

April 1, 2023 — March 31, 2024

#ghwins
#ghwinsephib

It is a great privilege to have received a federal grant and partnership with NCNW on the WINS initiative. WINS stand for Women's Immunization Networks. Our partnership began on April 1, 2023, and will expire on March 31, 2024. Every Region and U.S.-based Chapter of our Sorority will have an opportunity to impact our community with our participation in the project. The goals of Eta Phi Beta's participation are to increase the availability of messages that resonate with Black and Hispanic communities; to increase the range of trusted community voices (our voices) supporting vaccine education and vaccine delivery; to increase the number and diversity of vaccination opportunities; to increase the number of partnerships or collaborative activities between providers and community organizations (like Eta Phi Beta); and to implement strategies to increase vaccine confidence and reduce racial and/or ethnic disparities in adult vaccination coverage. Share this exciting news with all of our Employers, Schools, Universities, Families, Friends, Churches, Affiliates, Healthcare Providers, and Community Partners and invite them to join us as we raise awareness on the impact of timely immunizations.

Vaccinate the Flu, & You™

Getting a flu vaccine every year is very important. Getting a flu vaccine can:

- Keep you from getting sick with the flu.
- Help you and your family members reduce your risk of serious flu illness and flu-related complications, including hospitalization and death.
- Help protect people around you, including those who are more vulnerable to serious flu illness and flu-related complications due to age and/or certain chronic health conditions.
- Protect pregnant individuals and their babies – during and after pregnancy.

Charitable & Educational Foundation of Eta Phi Beta Sorority, Incorporated Grand Chapter

Please push the button below to review previously presented series of articles about the Eta Phi Beta Sorority, Incorporated Foundation.

Many of us are aware that we have a Foundation, but how many of us know more than that? This series hopefully answers some of the questions that you may have been wondering about Eta Phi Beta Foundation. Thanks to Grand Director of Education, Kimberly B. Shoulders for interviewing the three Presidents Kirk-Adair, Robinson, and McCurdy-Jackson who provided the valuable needed information that completed this series.

Answers to September's Parliamentary Quiz

1. The mover of a motion can speak against his/her own motion (False)

The member who makes the motion can't speak against his or her own motion, although he or she can vote against it. The person who seconds the motion, however, can speak against the motion because a second means "Let's discuss it," not Answers "I agree." Sometimes a member seconds a motion so he or she can speak against it

2. A motion is before the assembly when it has been moved and seconded (True)

Once your motion is presented to the membership by the chairman it becomes "assembly property", and cannot be changed by you without the consent of the members.

3. The motion to "Lay on the table" is used to kill a motion without a direct vote on it? (False)

Under Robert's Rules, the subsidiary motion to lay on the table refers to temporarily setting aside a pending motion (or a series of pending motions) .to take care of something else deemed urgent. If the motion laid on the table isn't taken from the table by the next regular meeting, the motion dies

4. Amendments can be applied to any motion regardless to whether or not they are germane (False)

Not all parliamentary motions can be amended and some motions are not subject to debate. For instance, a motion to adjourn the house can't be amended. Furthermore, incidental motions, such as parliamentary inquiries, points of order, and appeals for decisions by the chair are not subject to debate nor amendment. Therefore, any amendment should be relevant to the original proposal.

New Georgia Residents

Grand Tamiouchos Betty Collins and husband, Michael Collins have relocated from Rialto, CA to Warner Robins, GA to be close to their granddaughters and family. See them happily standing in front of their new home. Soror Collins, welcome to the Southeastern Region.

OCTOBER FUN FACTS

October 4th is National Noodle Day
October 16th is National Fossil Day,
Sweetest Day is on the 17th
Boss's Day is celebrated on October 19th

Those born in October can be born under one of two very different star signs. If you're born before October 23rd, then you have the sign of Libra.

The flower that has come to represent October is the calendula or marigold. When we see this bright yellowy-orange flower we think of the fall sunset and the changing leaves.

Marigolds represent comfort, healing and protection. Perfect for October, we say!

A Minnesota man has grown the world's largest pumpkin ever grown in North America.

It weighed 2, 749 pounds.
